

# Stuffing Activity via Vessel Max Kudo V N009 dated 3 September 2019

Some of Everchem's business activity includes witnessing the stuffing of our product into the container before the container is being loaded into the vessel.

This time around we witnessed our Boric Acid is being stuffed on 3<sup>rd</sup> September 2019. Before it is being stuffed into the container, we make sure to clean each of the bags.

Vessel Max Kudo V.N009 is estimated to depart from Port Klang on 6<sup>th</sup> September 2019 and arriving Ho Chi Minh on 10<sup>th</sup> September 2019.

The quantity of stuffing is 20 MT/800bags. Each of the bags weighs 25kg. One our personnel were present during the whole period.

At norm the stuffing activity is done at Port Klang. We will normally do our routine checks by making sure there is no shortage and to make sure that the stuffing process is done in an orderly manner.

At Everchem, we strive to give the best service to our client, hence frequent visit to this activity will be done from time to time to make sure the best quality and quantity of products ordered being delivered to our client.
